TO CUSTOMERS CONSIDERING USING BORDEN ELECTRICAL SERVICES (BES)

BES have been our only electrical contractors since their formation in January 2001. My commercial relationship with Derrick Parry, their MD, extends to some 15 years previous.

Their knowledge, expertise, workmanship, working to programme, CDM, site safety, liaison and “problem solving without hassle” is exemplary. Competitors will be hard pressed to match.

We have used BES for design and build, technical input, and small dayworks for office works- to include electrical, fire alarms, data, telephone/switchboards, comms, security and for complete electrical set ups for industrial production facilities – throughout the UK.

Their works for Fenrose have been for an electrician for one day up to an “electrical” project value of £150000.00.

24/7 is a statement they honestly perform to.

I have no hesitation in recommending BES - for any size of works – for any discipline of their repertoire – to any potential customer in the UK or overseas.

Jim Heathfield: Head of Contracts
